

## ON A COLLECTION OF HETEROPTERA (INSECTA: HEMIPTERA) FROM IRAN

H. Sakenin<sup>1</sup>, E. Jehamalar<sup>2</sup>, N. Samin<sup>3</sup>, H. Bolu<sup>4</sup>, S. Kushwaha<sup>2</sup>

**On a collection of Heteroptera (Insecta: Hemiptera) from Iran.** – **Sakenin H., Jehamalar E., Samin N., Bolu H., Kushwaha S.** – In this faunistic paper, the fauna of Heteroptera was studied in some regions of Iran. Totally, 18 species within eight families were collected and identified: Berytidae (two species, two genera), Coreidae (two species, two genera), Hebridae (one species), Miridae (three species, three genera), Piesmatidae (one species), Reduviidae (four species, three genera), Rhyparochromidae (two species, two genera), and Tingidae (three species, three genera). Three species, *Galeatus affinis* (Herrick-Schaeffer, 1835) (Tingidae), *Hebrus* (*Hebrus*) *liliimacula* Horváth, 1929 (Hebridae) and *Parapiesma salsolae* (Becker, 1867) (Piesmatidae) are new records for the fauna of Iran.

**Key words:** Heteroptera, true bug, species diversity, new records, Iran

**До питання знахідок Heteroptera (Insecta: Hemiptera) з Ірану.** – **Сакенін Г., Єгамалар Е., Самін Н., Болу Г., Кушвага С.** – У роботі представлена результатами вивчення фауни Heteroptera в різних провінціях Ірану протягом 2010-2016 років. Загалом в ході фауністичних досліджень було зібрано та ідентифіковано 18 видів, що належать до восьми родин: Berytidae (2 види, 2 роди), Coreidae (2 види, 2 роди), Hebridae (1 вид), Miridae (3 види, 3 роди), Piesmatidae (1 вид), Reduviidae (4 види, 3 роди), Rhyparochromidae (2 види, 2 роди) та Tingidae (3 види, 3 роди). Незважаючи на той факт, що фауна Heteroptera Ірану досліджена порівняно добре, з поміж ідентифікованих нами видів три – *Galeatus affinis* (Herrick-Schaeffer, 1835) (Tingidae), *Hebrus* (*Hebrus*) *liliimacula* Horváth, 1929 (Hebridae) і *Parapiesma salsolae* (Becker, 1867) (Piesmatidae) – є новими для фауни Ірану. Більша частина зібраного матеріалу зберігається у колекціях Г. Сакенін і Н. Самін, а також у колекції Р.Е. Ліннавуорі (Турку, Фінляндія).

**Ключові слова:** Heteroptera, справжні клопи, видове різноманіття, нові знахідки, Іран.

### Introduction

Heteroptera with more than 40,000 described species are known worldwide within 75 families (Weirauch, Schuh 2011), are important group among the insect orders not only for its numbers of species but also for their distribution and food preference (Henry 2009). Most of the heteropteran species are serious plant pests which feed on plants or plant material such as seeds, fruits or pollen. On the other hand, some of them are predators, catch

other insects and mites, reduce the population density of agricultural pests, and may be used in biological control (Schuh, Slater 1995; Schaefer, Panizzi 2000; Panizzi, Grazia 2015).

The fauna of Iranian Heteroptera was studied rather well and most of the families have been catalogued (see Ghahari et al. 2009a; 2009b; 2010a; 2010b; 2012a; 2012b; 2013a; 2013b; 2014; 2016; Ghahari, Moulet 2012a; 2012b; 2013; Ghahari, Heiss 2012; Ghahari, Cherot 2014;

Ostovan et al. 2017). Due to the economic importance of Heteroptera, the present study has been carried out and recorded 18 species, of which three species turned out new records to Iran.

## Material and methods

The studied materials of Heteroptera have been collected from different provinces of Iran between the years 2010 and 2016. Classification, nomenclature, host plants and distributional data provided by Aukema and Rieger (1995; 1996; 1999), Aukema et al. (2013) and CPH (2020) (Online Catalogue of Palaearctic Heteroptera) have been followed. Most of the materials are preserved in the collections of the first and third authors, and some others in the collection of late R.E. Linnavuori (Turku, Finland).

## Results

In total, 18 species of Heteroptera in 17 genera are listed in this paper, which were collected from different regions of Iran. Three species, *Galeatus affinis* (Herrich-Schaeffer, 1835) (Tingidae), *Hebrus (Hebrus) liliimacula* Horváth, 1929 (Hebridae) and *Parapiesma salsolae* (Becker, 1867) (Piesmatidae) are newly recorded from Iran.

### Infraorder CIMICOMORPHA Leston, Pendergrast and Southwood, 1954 Superfamily MIROIDEA Hahn, 1833

#### Family MIRIDAE Hahn, 1833

##### Subfamily Bryocorinae Baerensprung, 1860

###### Genus *Dicyphus* Fieber, 1858

###### Subgenus *Dicyphus* Fieber, 1858

###### *Dicyphus (Dicyphus) hyalinipennis* (Burmeister, 1835)

1835. *Phytocoris hyalinipennis* Burmeister, Hand. Ent. Berlin: 268.

Material examined: Kermanshah province, Javanrud, 34°81' N, 46°49' E, 1♀, August 2016.

Distribution outside Iran: Algeria, Andorra, Armenia, Austria, Bulgaria, Croatia, Cyprus, Czech Republic, France, Germany, Greece, Hungary, Iraq, Italy, Jordan, Liechtenstein, Luxembourg, Madeira, Malta, Morocco, Portugal, Romania, Russia, Serbia, Slovakia, Spain, Switzerland, Turkey, Ukraine (Aukema, Rieger 1999; CPH 2020).

##### Subfamily Orthotylinae Van Duzee, 1916 Genus *Dimorphocoris* Reuter, 1890

###### Subgenus *Dimorphocoris* Reuter, 1890

###### *Dimorphocoris (Dimorphocoris) tristis* (Fieber, 1861)

1861. *Orthocephalus tristis* Fieber, Die euro. Hem.: 292.

Material examined: West Azarbaijan province, Makoo, 39°29' N, 44°44' E, 1♀, September 2014.  
Distribution outside Iran: Algeria, Cyprus, Greece, Portugal, Spain, Tunisia, Turkey (Aukema, Rieger 1999; CPH 2020).

#### Subfamily Phylinae Douglas & Scott, 1865

##### Genus *Opisthotaenia* Reuter, 1901

###### Subgenus *Opisthotaenia* Reuter, 1901

###### *Opisthotaenia (Opisthotaenia) fulvipes* Reuter, 1901

1901. *Opisthotaenia fulvipes* Reuter, Öfv. Fin. Vet.-Soc. Förh., 43(B): 182.

Material examined: Kordestan province, Bijar, 35°89' N, 47°62' E, 1♂, 1♀, September 2011.

Distribution outside Iran: Albania, Armenia, Azerbaijan, Bulgaria, Greece, Iraq, Macedonia, Turkey, Ukraine (Aukema, Rieger 1996; CPH 2020).

#### Family TINGIDAE Laporte, 1832

##### Subfamily Tinginae Laporte, 1832

###### Genus *Copium* Thunberg, 1822

###### *Copium clavicorne clavicorne* (Linnaeus, 1758)

1758. *Cimex clavicornis* Linnaeus, Systema naturae: 442.

Material examined: Mazandaran province, Tonekabon, Jangal-e 3000, 1♀, September 2013.

Distribution outside Iran: Albania, Armenia, Austria, Azerbaijan, Belgium, Bosnia-Herzegovina, Bulgaria, Croatia, Czech Republic, France, Georgia, Germany, Greece, Hungary, Israel, Italy, Liechtenstein, Luxembourg, Macedonia, Moldavia, Montenegro, Poland, Romania, Russia, Serbia, Slovakia, Slovenia, Switzerland, Turkey, Ukraine, Yemen (Aukema, Rieger 1996; CPH 2020).

###### Genus *Galeatus* Curtis, 1833

###### *Galeatus affinis* (Herrich-Schaeffer, 1835)

1835. *Tingis affinis* Herrich-Schaeffer, Nomen. Ent. Ver. euro. Ins.: 58.

Material examined: Chaharmahal & Bakhtiari province, Shalamzar, 32°05' N, 50°82' E, 2♂♂, August 2012. New record for Iran.

Distribution outside Iran: Afghanistan, Albania, Austria, Bulgaria, Byelorussia, China, Croatia, Czech Republic, Kazakhstan, Germany, Hungary, Italy, Japan, Kazakhstan, Kirgizia, Korea, Latvia, Lithuania, Macedonia, Mongolia, Poland, Romania, Russia, Serbia, Slovakia, Slovenia, Switzerland, Ukraine, United States of America (Aukema, Rieger 1996; CPH 2020).

###### Genus *Tingis* Fabricius, 1803

###### Subgenus *Tropidocheila* Fieber, 1844

###### *Tingis (Tropidocheila) caucasica* (Jakovlev, 1880)

1880. *Monanthia (Tropidocheila) caucasica* Jakovlev, Ann. Hist.-Nat. Mus. Nat. Hung., 4: 136.

Material examined: Guilan province, Talesh, Gisum forest, 2♀♀, 1♂, July 2015.

Distribution outside Iran: Armenia, Azerbaijan, Bosnia-Herzegovina, Bulgaria, Croatia, Georgia, Macedonia, Moldavia, Romania, Russia, Turkey, Ukraine (Aukema, Rieger 1996; CPH 2020).

#### **Superfamily REDUVIOIDEA Latreille, 1807**
